EDUCATION

Fairfield University Master of Science in Data Science	Jan 2024 – Dec 2025 Fairfield, CT
Mumbai University Bachelor of Science in Computer Science	May 2020 – May 2023 Mumbai, India

EXPERIENCE

Graduate Teaching Assistant Fairfield University	Aug 2024 – Present Fairfield, CT
--	--

- Mentored **80+** students on data exploration, project structure, and analytical best practices, enhancing overall output quality.
- Designed hands-on labs using **pandas, matplotlib, and scikit-learn**, contributing to a **12% improvement** in student performance.
- Improved assignment review workflow by reducing student errors **25%** and saving faculty **10+ hours** in grading time through standardized templates and instructional support.

Project Manager Hodson Realty	Sep 2024 – May 2025 Fairfield, CT
---	---

- **Led a team of 4** to build a predictive model identifying high-probability home sellers, **boosting lead-qualification accuracy by 30%** for real-estate partners.
- **Applied Logistic Regression, Random Forest, and SMOTE** to correct class imbalance, increasing model recall for minority classes by **22%** and improving overall model reliability.
- **Developed and deployed a Streamlit dashboard** that visualizes predictions, feature importance, and evaluation metrics, **reducing analysis time for stakeholders by 40%**.

Data Analyst Intern Josho IT Solution	Aug 2021 – Jan 2022 Mumbai, India
---	---

- Built dashboards to track engagement, conversions, and performance metrics, improving decision-making for marketing teams.
- Optimized SQL queries and implemented caching techniques that **reduced page load time by 30%**.
- Collaborated with developers to align reporting tools with backend pipelines, **improving data accuracy and reliability**.

PROJECTS

GDP vs. Suicide Rate Visualisation	Jun 2025 – Sep 2025
---	----------------------------

- Built Tableau dashboards analyzing GDP and suicide rates across **50+ countries**, revealing key socioeconomic risk patterns.
- Examined demographic segments to identify **high-risk groups** and contributing factors using statistical analysis.
- Delivered clear, interactive visualizations that strengthened **data-driven storytelling** and stakeholder understanding.

Twitter Sentiment Analysis for Marketing	Mar 2024 – Jun 2025
---	----------------------------

- Built and fine-tuned an NLP sentiment model on **100K+ tweets**, raising classification accuracy from **85% to 90%**.
- Identified sentiment patterns and keyword trends that helped marketing teams **optimize audience targeting**.
- Automated the end-to-end model pipeline and produced visual summaries to support **faster business decision-making**.

Real Estate Data Scraper & Dataset Contribution	Jan 2024 – Mar 2024
--	----------------------------

- Built a scalable web scraper to collect and clean real estate listings from multiple sites, producing an analysis-ready dataset.
- Published the dataset on Kaggle, receiving **50+ downloads** and engagement from the data science community.
- Validated data quality through exploratory analysis and visualizations, uncovering key **price and market trends**.

TECHNICAL SKILLS

Core Skills: Machine Learning, Statistical Modeling, A/B Testing & Experimentation, Feature Engineering, Time Series Analysis, Data Wrangling, Data Visualization, Predictive Analytics, Model Evaluation & Validation, NLP
Tools & Platforms: Python, SQL, R, Tableau, Power BI, Excel, Git, Azure, Snowflake, GCP, BigQuery, MySQL
Other: ETL, API Integration, Feature Engineering, Docker, Linux, Workflow Optimisation, Cloud Computing

ACHIEVEMENTS

- Recognised for selection to NSBE Conference in Chicago. (Top-performing student in STEM)
- Secured First Place in the Fairfield University Hackathon.
- Supported family import-export business operations, managing logistics and trade coordination.
- Founded and operated a stock brokerage business in INDIA, acquiring clients and earning commissions.
